CROSS-BROWSER · MOBILE QA

Admin Console — QA Checklist

Use this checklist to verify the Admin Console works across major browsers and mobile devices. Test each section on every target browser/device combo.

1. Target Matrix

	Check	Notes
■	Chrome (latest) — Android + Desktop emulation	
■	Safari (latest) — iOS 16 / 17 / 18 (iPhone SE, 13, 15 Pro)	
■	Firefox (latest) — Android + Desktop	
■	Edge (latest) — Desktop + Windows tablet	
■	Samsung Internet — Android	
■	In-app browsers: Instagram, WhatsApp, Gmail	

2. Layout & Responsiveness

	Check	Notes
■	No horizontal scroll at 320px, 375px, 390px, 414px, 768px widths	
■	Header stays sticky; hamburger menu visible on <1024px	
■	Drawer opens/closes; backdrop dismisses; Escape key closes on desktop	
■	Body scroll locks while drawer is open (no double-scroll)	
■	Dashboard cards stack to single column on mobile	
■	Proof gallery grid: 1 col mobile, 2 col tablet, 3+ col desktop	
■	Safe-area insets respected on iPhone notch/home indicator	
■	Content reflows correctly in landscape orientation	

3. Touch Targets & Interaction

	Check	Notes
■	All buttons/links ≥ 44×44px hit area	

■	Nav drawer links ≥ 48px tall	
■	Form inputs ≥ 48px tall (no iOS auto-zoom)	
■	Input font-size ≥ 16px on iOS to prevent zoom	
■	No hover-only affordances (all actions reachable by tap)	
■	Active/pressed states visible on tap	

4. Forms — Login, Settings, Proofs

	Check	Notes
■	Email/password fields use correct inputMode and autocomplete	
■	URL field uses inputMode='url'	
■	File input accepts image formats; shows chosen file name	
■	Upload progress or spinner visible; button disabled while pending	
■	Error toasts readable, not clipped by keyboard	
■	Keyboard 'Done/Go' submits form where expected	
■	Password managers (1Password, iCloud Keychain) fill correctly	

5. Proof Gallery Manager

	Check	Notes
■	Upload → preview → save flow works end-to-end	
■	Signed URLs load images (no broken thumbnails)	
■	Edit modal opens, saves, and closes cleanly	
■	Delete confirmation prevents accidental removal	
■	Published/unpublished toggle reflects instantly	
■	Long titles/descriptions truncate with ellipsis, no overflow	

6. Auth & Session

	Check	Notes
■	Sign-in redirect to /admin/login works when unauthenticated	
■	Session persists across refresh on all browsers	
■	Sign-out clears session and returns to /admin/login	
■	Claim-admin bootstrap only visible when no admin exists	
■	Non-admin users are denied gracefully	

7. Performance

	Check	Notes
■	First paint < 2s on 4G throttled	
■	Interaction to next paint < 200ms on mid-tier Android	
■	No layout shift after drawer open, image load, or toast	
■	Images lazy-load below the fold	

8. Accessibility

	Check	Notes
■	All interactive elements reachable via keyboard (Tab/Shift-Tab)	
■	Focus ring visible on focused element	

■	aria-label on icon-only buttons (menu, close, sign out)	
■	Color contrast ≥ 4.5:1 for body text	
■	Screen reader announces route/page changes	

9. Visual & Theme

	Check	Notes
■	Amber accent renders correctly (no fallback to browser default)	
■	Dark background consistent — no white flashes on navigation	
■	Icons crisp on 2x/3x retina displays	
■	Fonts load without FOUT/FOIT flash	

10. Regression Sign-off

	Check	Notes
■	Tested on: Chrome ■ Safari ■ Firefox ■ Edge ■ Samsung ■	
■	Devices: iPhone ■ Android ■ iPad ■ Desktop ■	
■	Tester name & date recorded	
■	Blocking issues filed with screenshots	
■	Sign-off given by admin owner
